Fueling Solutions for a Better Tomorrow

Product Overview

The GKD-550 is an electric AdBlue / DEF / AUS 32 urea-solution transfer pump system. The photographed assembly includes the GKD-550 pump, electronic flow meter, transparent filter housing and stainless-steel mounting plate. The complete kit configuration can also be supplied with compatible hose, nozzle and fittings as shown on the catalog cover.

Specification	Details
Brand / Model	GKD / GKD-550
Product Type	Electric AdBlue / DEF / Urea Transfer Pump System
Voltage	230V AC
Frequency	50Hz
Rated Flow	40 L/min
Rated Current	2A
Duty Type	Continuous Duty
Ventilation	Self-ventilated
Suitable Fluid	AdBlue / DEF / AUS 32 / compatible urea solution
Typical Installation	IBC tank / drum / dispensing system, subject to compatible fittings

Key Selling Points

40 L/min rated flow: Efficient transfer for commercial DEF/AdBlue handling applications.

230V AC operation: Designed for compatible 230V, 50Hz electrical supply.

Continuous-duty design: Pump label identifies the unit for continuous-duty operation.

Self-ventilated construction: Integrated ventilation for regular dispensing use.

Integrated system components: Pump assembly can be combined with electronic meter, filtration, delivery hose, nozzle and compatible fittings.

Commercial applications: Suitable for workshops, garages, fleet facilities, transport operations and DEF/AdBlue dispensing installations.

Applications

AdBlue / DEF transfer and dispensing; AUS 32 urea-solution handling; IBC and drum transfer systems; truck and bus DEF filling; automotive workshops; fleet maintenance facilities; service centers; transport companies; and compatible commercial dispensing systems.

Complete Kit Components

Depending on ordered configuration: GKD-550 electric urea pump, electronic flow meter, transparent filter assembly, stainless-steel mounting plate, delivery hose, suction hose, dispensing nozzle and compatible connectors/fittings.

Packaging

Standard packing: Secure export-standard carton packing. Exact carton dimensions, net weight, gross weight, included accessories, MOQ and lead time should be confirmed according to the final ordered configuration.
